Starseeds- The Big Event- Will It Happen? - Conversation with Yazhí Swaruu

Robert.- That all this is like “a simulation” using that word to describe this. That is why no Federation is going to do anything. Nor do I believe that this humanity will develop much more technologically.

Yazhí Swaruu.- That's right, exactly.

Robert.- And I question whether it will become interstellar.

Yazhí Swaruu.- The idea is that human civilization is contained where it is. And the fact that they want to awaken the starseeds or the population causes the “reset”, because they spoil the concept of what happens there, what life in 3D is. If you don't like it, there are other places and planets.

Robert.- And that's why they live only one tenth of what aliens live ... If you live a lot you reach wisdom and with it a "5D" mental state.

Yazhí Swaruu.- That is why they live only 10% of what other Lyrian races live.

Robert.- Yes. It is well understood. That is why we are at the end of this civilization. Swarúu said: The year 2025 will be nothing what you know now.

Yazhi Swaruu.- And what reason she had.

Robert.- They will never give that Med Pod technology.

Yazhi Swaruu.- I have seen that they promise it on other YouTube channels and in other places, that's right, they will not give it because that would also break the concept.

Robert.- Sure. Only a few. And those few have no frame of reference that they are in 5D. Then life will continue very much the same or similar to what it is now. They will not extend life much longer. Not with Cyborgs or with Transhumanism.

Yazhi Swaruu.- That's right, no. And that is why they have to attack the starseeds, they are too awake.

Robert.- Yes. The seeds as a concept is REAL. We are "ALL." Aliens experiencing being human here.

Yazhi Swaruu.- Seeds, a concept that comes from reincarnation.

Robert.- Exactly.

Yazhi Swaruu.- Reincarnation is attacked by the Catholic Church because it would collapse the idea of population control, like 'if you behave well you will go to heaven, or behave badly you will go to hell', it (reincarnation) collapses the idea that Christ sacrificed himself for our sins . Reincarnation is real, and there are proofs everywhere that come out on a daily basis. Therefore the seeds must be real.

Robert.- Sure, but they are not interested in not knowing that this is real, or that extraterrestrial life exists outside of Earth. They say they are sending probes to Mars to see if they can discover petrified bacterial life. And now the 'Earth is flat' again.

Yazhi Swaruu.- Another concept: That there are NO extraterrestrials and that they are inter-dimensional. From a high-density perspective that's true. Only from that perspective, because the principle of non-locality applies. Where from the Ether or higher dimensions, everything is contained in a single idea. The Source. Only being a channel or frequency that they are on one planet and not on another. It is the same principle of a ship in supra-luminal flight. You just change the frequency to the destination. Because there are no distances, that is just an illusion, as is time. So from above, from Ether, from higher dimensions, there are NO distances. So, be it Cyndriel, Temmer, Erra, Earth, Alfrata, Pitoya, Lyra... it doesn't matter which planet, everything is solved by traveling inter-dimensionally. So the aliens are inter-dimensional, and everything is contained in the here, as in the case of time everything is contained in the now. But from lower dimensions, if they are "from other planets." So it depends on the perspective from which you look at them. And the Earth is round with a non-uniform shape, like a geode, dented, and it is not perfectly spherical, but it is NOT flat!

Robert.- Yes, you explain it super well. It depends on the level of awareness we have to process the information. "All souls are Universal and none comes from any specific place, they are all The Source and all are the same soul, what differentiates them from each other is only the level or range of memory that they have during some observable point of its existence, sometimes but not always called a 'reincarnation.'" Anéeka told me yesterday, "They are all the same soul." And the multi-universes. Talking about the multi-universes contradicts everything that has been said ... Multi-universes is absurd.

Yazhí Swaruu.- That is silly. That many Universes, that create a multi-universe, that all together create an Omniverse. Human mind, addicted to duality. It is a whole. The separations are only in the minds of those who are observing, and they only denote it their own limitations, not external ones.

Robert.- Materialism, reductionism and determinism, yes?

Yazi Swaruu.- All that, yes.

Robert.- Human science. Would you add something to this that Anéeka said? "I speak here of specific races on purpose without specifying or taking into account that in the end all souls are universal, and none comes from any specific place, since they are all The Source and all are the same soul, being that the difference between them is only the level or range of memory they have during some observable point of their existence, sometimes but not always called a 'reincarnation.'"

Yazhí Swaruu.- no, it's fine as it is. I will just add that these limitations of perception are what create the so-called densities, but they are just ideas.
