### **THERE IS NO FREE WILL ON EARTH – ANEEKA OF TEMMER**

Video link.- <https://youtu.be/yTjYs1TsyDY>

**Anéeka of Temmer.** - To clarify, remember that this is an interpretation you publish about us, because we are so much more, always more. It is not to make you less. It is because you must realize that you do not know everything, that there is more, and that the reason why we talk to you is because the others have a broom stuck in their butts that reaches to their brains. I'm sorry to be rude, but it's because you listened and the others didn't, and each of us only reflects what they are with their theories about us, theories that are nowhere close to what we are. The theory that I like the most is the "government plot" one, that says that we are a strategy to dismantle the spiritual ascension of the Spanish-speaking world. I was able to dismantle that in a moment, the elite already does that with more efficient strategies such as filtering videos of certain topics and creating trolls and entire channels to transmit misinformation, as well as control over the mass media.

Inventing ourselves would be an inefficient and costly strategy, as well as very difficult because an entire civilization would have to be invented and be consistent, and on the other hand, in general, not so many people listen (to us). Point the finger at the expansive Hinduism controlled by the Cabal, because everything comes from there. We are just more people, yet we are not human either.

**Robert.** - The point is that humanity is not used to talking to other races, that is the point, and when they see someone to communicate with they forget that they are extraterrestrial, it is as if I could talk to my cat, there would come a time when I wouldn't be seeing a cat but someone else.

**Anéeka of Temmer.** - The truth is that we are not human, it is not a question of superiority or anything like that, it is just that deep down we are different, but here it is normal to know that we are different and still truly respect each other. That is why I say "we are more people", I do not say we are more human. As we have already said, they only see the most human part of us, the other part is more difficult to see or understand. I know they see us as crazy, as unlikely, so we must also keep our distance from them.

**Robert.** - I wouldn't say as much...

**Anéeka of Temmer.** - Not you, but most do.

**Robert.** -I imagine that most continue to associate aliens with ships and being able to go out for a walk with them, things like that.

**Anéeka of Temmer.** - Before you could, but times have changed, you just see that almost every time Dhor Káal'el goes on a mission he has some kind of altercation with humans, it's no longer safe or sensible to fly around just because. I have not lived through that time, not really, I am very new here from 2016 till now.

They chase him with advanced radars or send planes after him; he's already been shot with some kind of energy weapon. The 'karmic shield' protected him because the energy returned to starting point, other times he has been denied entry into airspace "chewing" no longer from the transponders, but it is no longer safe.

**Robert.** - Eh that the Federation does not experiment with humans, it only observes?

**Anéeka of Temmer.** - They say no, but how do you know? Without wanting to cause alarm, I would say that of course they do experiment on humans, we should also define what "experimenting on humans" is, if Robert knows that they do.

**Robert.** - Not genetics, right, is it more on a metaphysical level?

**Anéeka of Temmer.** - Of course! All kinds of experiments.

**Robert.** - So here and there is no longer free will, and are the Alphrateans aware of all that they do to their terrestrial family?

**Anéeka of Temmer.** - There is no free will, there is only a distorted version, excuses to explain what is and what is not free will, but the truth is the truth even if it hurts. It's not a free will planet, Alphratean family? I do not know.

**Robert.** - Is there no free will and no time line? Is everything an idea of an illusion, and is it true that all this is limited by the consciousness of each one?

**Anéeka of Temmer.** - Free will is only observed from what a soul desires, from its points of view from higher densities, not considering the desires and needs and someone experiencing the limited life of the 3D, just observe how the unconscious dominates over the conscious, there you can see it, how unfair it is, you know that something is wrong or that you need to change something about yourself, but it continues to react without logic just because the programming in the unconscious is triggered. That is not free will, the Cabal fighting against yourself. And yes, there are time lines, but not as they say there, but what composes them is only the consciousness of each person; you don't live a timeline or are in a timeline, you are a timeline, you are it, what you live, what you think... And the collective lines are illusions based on perception agreements that will never be the same. You have the agreement with Gosia and with Matías to interpret a particular object as a chair, there is the perception agreement, but it will never be the same. 'Chair' has a different personal interpretation for each of you, as with everything. It is apparent that there are agreements and therefore the conflicts are there as well.

**Robert.** - You're right, you know something is wrong... nice answer, I like it: it's a timeline. Yes, I have realized what you say we have a different perception, I have verified that myself.

**Anéeka of Temmer.** - Yes, it only appears to be the same.

**Robert.** - Yes, we can all walk through the same forest, but experience seeing and hearing different things, but not the same.

**Anéeka of Temmer.** - That's right, the forest is different for everyone.

**Robert.** - Yes, and the same with the city and the people, that is what makes us different from living in different densities, although sometimes it seems as if we coincide.

**Anéeka of Temmer.** - Yes, density is only the series of agreements and what people can see depending on their more or less expanded experiences.

**Robert.** - Imagine! Yes.

**Anéeka of Temmer.** - Being expanded simply more experience, more memory, and understanding of more places, of more things... The understanding of what is or is not real is abysmal and never before could one see so clearly the concepts of starseeds versus humans, and them versus us, to the degree that there is already friction...

**Robert.** - Especially in the way of thinking and seeing life.

**Anéeka of Temmer.** - Before you could walk unnoticed as a seed, today not anymore, they point at you and turn against you because you are different, in the name of everyone's safety, I mean muzzles(masks).

**Robert:** Do you keep seeing this civilization disappear? If they are all sterile I only give them 100 years.

**Anéeka of Temmer.** - They don't make it to 2030, Robert.

**Robert.** - By 2030? So here there is no ascension as some say, I know that all this is individual.

**Anéeka of Temmer.** - Again it depends on the definition of ascension, because dying and returning en masse all to their original sources is ascending.

**Robert.** - Yes, then what does the 'Age of Aquarius' mean, all that? But I don't see them all returning to The Source.

**Anéeka of Temmer.** - I couldn't interpret it, I don't know how to connect it to the Age of Aquarius in that way.

**Robert.** - How do you see it then?

**Anéeka of Temmer.** - I only know that they are in serious danger and they don't see it, they believe that the danger is a virus when it is their governments. I only know that millions will die in the next ten years if things continue as they are today; They don't want to listen to me due to negativity.

**Robert.** - Anéeka nobody tells me that you are negative.

**Anéeka of Temmer.** - They believe that the Pleiadians should only speak of love and give hope. I only speak the truth, and that is the truth even if it hurts. I prefer to tell the truth rather than spread empty hopes, thank you. And I'm always waiting for something to change in people's favor.

**Robert:** There are no more remaining of those 'unconditional lovers', they are more realistic and believe in integration. People are beginning to see that they have to do things. Don't wait for the big solar event.

**Anéeka of Temmer.** - That won't happen. The sun is doing absolutely nothing unusual, nor will it.
